**Professional Experience****FREELANCER****okservicesnetwork**

San Jose, CA

September 2014 to November 2018

Development of Rest APIs and Web App serving as a reservation and planning system for travel agencies that sell travel to the Caribbean.

**SOFTWARE DEVELOPER****StatRow**

Atlanta, GA

June 2013 to September 2014

Freelancing development project. Development of a website and mobile application to share scores of High School sport games. Most of the development was done with Javascript and other standard web technologies. Also used Angularjs and Ionic framework.

**SUPPORT SOFTWARE ENGINEER****DESOFT (Development Software)**

Cuba

September 2008 to March 2013

Provide development and technical support services for Desoft's Accounting Software Suit. As a member of the technical team of Desoft, I had the duties to work closely with clients on the central region of the country, providing them with technical support and extensibility of our base suit through customizations to the product. From requirements gathering, customizations development, implementation and configurations, I was part of the entire lifecycle of these projects.

**Achievement Highlights:**

- Provide support to clients once they were live and maintain the extended relationship.
- Modify and develop new features of the base applications as needed.
- Troubleshooting and analyzing user and system issues from a functional and

technical perspective.

- Create SQL scripts to help resolve problems at the database level.
- Provide information security services and training in different areas to clients about products and technologies.

## **SOFTWARE ENGINEER**

### **Senior Design Project**

Havana, Cuba

2008

As part of my Senior Design project, I teamed with another classmate and the Cuban CENTER FOR GENETIC ENGINEERING AND BIOTECHNOLOGY (CIGB). Our project was to develop a system to create and maintain records of their chemistry studies lab. The project was executed from requirements gathering, all the way up to the implementation phase. The end result was a web based system, developed with php symfony framework as well as other common web technologies. With the success of the project we were able to secure the maximum score as well as great recommendations for my first job out of college.

## **TEACHING ASSISTANT**

### **Calculus II and III**

Havana, Cuba

2005-2007

I was a student assistant for 3 years, specifically in the area of Mathematics (Calculus 2 & 3). Among others, my main tasks included grading, leading review sessions and holding office hours.
